FT25K

The FT25K is made from double-temperature baked glass and aluminum, which is characterized by a lifelong durability and modern design. The keyboard of the FT25K has the same design as the [Wizard Elite videophone](#).

That makes the FT25K the ideal module to expand and secure your access system. The FT25K code keyboard is available in black or aluminum / silver color and works with RGB lighting, allowing you to choose a suitable color yourself.

Specifications:

- The keyboard is securely fastened with 4 anti-vandal screws.
- A badge reader can be installed invisibly.
- The keyboard is equipped with RGB lighting. So you can choose the color yourself!
- The 6mm thick glass front plate is baked 2x at high temperature for a lifelong durability.
- The frame made of brushed aluminum rounds off the whole perfectly. Finishing: alu natural or black anodised.
